

Why use Mooncups?

The Mooncup menstrual cup is...

Comfortable

Made from soft, medical-grade silicone, it's so comfortable you can't feel it's there.

Convenient

Your Mooncup is always there, ready. No last minute dash to the shops, no stockpiling different absorbency pads or tampons.

Reliable

Holding 3 x more than a regular tampon, the Mooncup menstrual cup gives you longer lasting protection on heavier days. And because it's non-absorbent, it won't cause dryness when your period's light.

Money-saving

You only need one Mooncup that pays for itself after 6-8 months – you're then saving that monthly spend on sanitary protection.

Gentle

Latex-free, hypoallergenic and containing no dyes, perfumes, BPA, phthalates, plastic, bleaches or toxins.

mooncup®
