

Construction

Construction Management Level 4 Higher National Certificate (HNC) Full-time - (HTQ)-Subject to approval

In Brief

Start Date / Duration

The course starts in September 2024 and last for one year.

Entry Requirements

You will need:

- A BTEC Level 3 qualification in Construction
- GCSE English and Maths at grade 4/C or above
- Other related Level 3 qualifications including an Access to Higher Education Diploma
- Relevant work experience
- Or hold an international qualification equivalent to the above

You will achieve

You will gain a Level 4 Higher National Certificate in Construction Management for England (HTQ).

Course Overview

The Level 4 units lay the foundation of learning by providing a broad introduction to construction and different construction management functions. This develops and strengthens core skills while preparing you for specialist subjects at Level 5 or to enter employment with the qualities necessary for job roles that require some personal responsibility.

You will study in our state-of-the-art purpose-built Construction Centre [<https://www.barnsley.ac.uk/campuses/construction-centre/>] and be taught by industry experts.

This HTQ [<https://www.barnsley.ac.uk/courses/higher-technical-qualifications-htqs/>] provides the opportunity to gain the proper training, knowledge and skills to be successful in the workplace. Visit the HTQ page [<https://www.barnsley.ac.uk/courses/higher-technical-qualifications-htqs/>] for further information.

Please note: this course is subject to approval.

Course Content

You will gain a wide range of construction knowledge linked to practical skills gained through research, independent study, directed study and workplace scenarios.

You are involved in vocational activities that will help you to develop behaviours (the attitudes and approaches required for competence) and transferable skills such as communication, teamwork, research and analysis, which are highly valued in Higher Education and in the workplace.

By the end of Level 4, you will have sound knowledge of the basic concepts of construction; be competent in a range of subject-specific skills; as well as holding the general skills and qualities relevant to key areas of construction.

Units of study:

- Unit 1: Construction Design Project (Pearson-set)
- Unit 4: The Construction Environment
- Unit 2: Construction Technology
- Unit 5: Legal and Statutory Requirements in Construction
- Unit 26: Digital Applications for Building Information Modelling
- Unit 11: Financial Management and Business Practices in Construction
- Unit 12: Tender and Procurement
- Unit 13: Building Information Modelling
